

Quality Policy

GOAL

Our Goal is to deliver consistently high quality *ENGINEERING SOLUTIONS* to our Clients.

COMMITMENTS

- Comply with all relevant standards, regulations and industry codes of practice.
- Maintain a Quality Management System (QMS) that they conforms to recognised standards including ISO 9001 .
- Ensure that Quality is maintained as a primary value of our Company.
- Follow established procedures to carry out, document and review work such that a reproducible and consistently high standard of suitable work is achieved.
- Maintain a program to allow for the review and continual improvement of work procedures to ensure the continued relevance and appropriateness of these procedures for producing suitable work and eliminating non-conformances.
- Maintain work and project implementation procedures along with internal and external communications to reduce the amount of rework and revision required.
- Establish measurable objectives to ensure our work continues to satisfy the requirements of our clients and relevant authorities.
- Increase the awareness and understanding of project requirements and their underlying intentions amongst our staff through all stages of projects.
- Develop and implement appropriate engineering judgement in all employees.
- Provide mentoring, training and education to personnel to allow them to carry out their work and improve their proficiency, as well as providing them training for professional advancement and leadership.
- Establish an open atmosphere where ideas are freely voiced with suitable processes to provide feedback as well as assess and implement innovative concepts where appropriate.
- Implement a process to Identify, address and quickly resolve quality issues identified by the community and our clients to an acceptable standard.

Brett Paton

Director
